

EL CID RENTAL & TESTING SERVICES

Service providers and plant maintenance teams make use of the Iris Power EL CID Evolution tester to find imperfections in the core inter-laminar insulation of motors and generators. For clients wishing to acquire the necessary skills for testing and analysis, Qualitrol-Iris Power offers an on-site training seminar.

For those projects where an instrument is not available, Qualitrol-Iris Power provides either the rental service, or specialist testing service, complemented by test report service. Currently our offices in Canada and Switzerland offer those services. Contact your Sales Representative for further details.

ORDER
